

Mock job interview

This tool is addressed to professionals guiding migrants in their first experiences searching for a job. Two participants will perform a short mock interview and two others give feedback.

As the participants have done their CVs previously, the trainer will set up the mock interview based on one of their previous jobs to make the participants feel confident. The interview should take 5 - 8 minutes and the feedback has to be specific and positive, allowing the participant to improve his/her replies.
